

CODE CAFÉ: ~~La~~TeXCHEAT SHEET

Contents

1. CHEAT SHEET

1.1. **Universal commands.** **Headers** are created by the section commands. In this sheet, 'Cheat Sheet' is a section, 'Universal commands' is a subsection, and 'Headers' is a subsubsection.

```
\section{Section Title}
\subsection{Subsection Title}
\subsubsection{Subsubsection Title}
```

And here is an itemization:

- first thing
- second thing
- third thing

```
\begin{itemize}
\item a bullet
\item another bullet
\item yet again another bullet
\end{itemize}
```

To render something atomic (that is, indivisible), you simply enclose it in `{ }`. For example, to make a bolded item that you do not want to be broken up by automatic line breaks, you can enclose it.

```
{\bf Some Awesome Thing!}
```

.
